the implication of a positive margin is that cancer has been left behind, and the patient may need additional therapy such as follow-up postoperative ebrt.

its mrna approach for infectious diseases could have a big advantage if proven to work over current methods. the thymus gland makes t cells and is the master gland of a healthy immune system. you notice that it's only striving to improve that is inauthentic; 'real' is cruel, gritty, sexy, and reprobate.
